Former UK Energy Minister – Charles Hendry

Quote from the Hendry Review 2017:

«I am in no doubt that there are promising innovations and technological advancements that could be made as part of a tidal lagoon programme, and that could help drive down costs... One possible example is the Tidetec rotating turret.»

Over 300GW of potential tidal range capacity identified globally.

>40 potential ports and docks in UK and France (Tidetec-in-a-box market)

... since Tidetec is well recognised in UK
